Bengaluru, Karnataka | Portfolio

SUMMARY

Artificial Intelligence & Machine Learning graduate who develops AI-powered applications and backend systems with a focus on solving practical business and user problems. Experience includes building end-to-end software projects that integrate machine learning, web technologies, and scalable application design from concept to deployment. Brings a product-oriented mindset, strong analytical thinking, and a commitment to writing reliable, maintainable software while continuously adapting to modern development practices.

TECHNICAL SKILLS

- Programming Languages:** Python, SQL, JavaScript
- Backend Development:** Flask, FastAPI, RESTful APIs
- Frontend:** React.js, HTML, CSS
- Databases:** MySQL, PostgreSQL
- Artificial Intelligence & Machine Learning:** Machine Learning, Deep Learning, Generative AI, TensorFlow, Scikit-learn, NumPy, Pandas
- Cloud & DevOps:** Microsoft Azure, Docker
- Tools & Platforms:** Git, GitHub, VS Code, Jupyter Notebook, Google Colab, Postman
- Core Concepts:** Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA), Database Management, Software Development Life Cycle (SDLC), Operating Systems (OS)

PROJECTS

Deepfake Detection System (Major Project)

Tech Stack: Python | Flask | React.js | TensorFlow | Keras | OpenCV | MySQL

Developed a full-stack AI-powered Deepfake Detection System for analyzing images, videos, audio, and articles using deep learning and computer vision.

- Built RESTful Flask APIs and integrated them with a React.js frontend for secure file upload and real-time prediction.
- Achieved **90%+ detection accuracy** with optimized preprocessing and inference, delivering predictions in under 2 seconds.
- Integrated misinformation detection and an AI chatbot to enhance content verification and user experience.

GitHub: <https://github.com/AbdulRehmanShariff/Deepfake-Detection-System>

Smart Resume Screening & Candidate Ranking System

Tech Stack: Python | Flask | React.js | MySQL | spaCy | Sentence Transformers

- Developed an AI-powered Resume Screening System that automatically ranks candidates based on job descriptions using NLP.
- Extracted data from PDF and DOCX resumes using Sentence Transformers and spaCy.
- Achieved **92%+ semantic matching accuracy** and processed **100+ resumes** for automated candidate evaluation.
- Built a recruiter dashboard to visualize rankings, match scores, and candidate insights.

INTERNSHIPS

Data Science Intern | QSpiders, Hebbal

Feb 2026 – May 2026

- Gained hands-on experience in **Python, SQL, NumPy, Pandas, OOP, and SDLC** through project-based training.
- Built data analysis workflows and strengthened problem-solving skills using Python.

Full Stack Developer Intern | Verilegal.in

3 Months

- Developed responsive web applications using **React.js, Flask, JavaScript, HTML, CSS, and MySQL**.
- Built backend APIs, integrated databases, and collaborated on feature development and debugging.

Artificial Intelligence Intern | LearnX (Powered by Wipro)

2 Months

- Applied Artificial Intelligence and Machine Learning fundamentals through hands-on projects and practical learning modules.
- Worked on data processing, model development workflows, and real-world AI application use cases.

EDUCATION

Bachelor of Engineering (B.E.) in Artificial Intelligence & Machine Learning
KNS Institute Of Technology

2022 – 2026
CGPA: 7.61

CERTIFICATIONS

- Python with Data Science Certification
- Artificial Intelligence Internship Certification
- Azure AI Fundamentals
