SUMMARY

Recent Artificial Intelligence & Machine Learning graduate with hands-on experience in Python, Flask, SQL, and web application development. Developed database-driven and AI-powered applications using Python and MySQL, with a strong foundation in backend development, problem-solving, and scalable software design.

TECHNICAL SKILLS

Programming Languages: Python, SQL, JavaScript

Backend & Web Development: Flask, RESTful APIs, HTML5, CSS3

Databases: MySQL

Libraries & Frameworks: NumPy, Pandas, Scikit-learn, TensorFlow, OpenCV

Machine Learning & AI: Machine Learning, Generative AI

Tools & Platforms: Git, GitHub, VS Code, Jupyter Notebook, Google Colab

Core Concepts: Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA), Database Management

PROJECTS

Deepfake Detection System (Major Project)

Technologies: Python, Flask, React.js, MySQL, TensorFlow, Keras, OpenCV

- Developed a full-stack web application to detect manipulated image, video, and audio content using Python-based machine learning models.
- Designed and integrated a Flask backend for file upload, processing, and real-time prediction workflows.
- Optimized data processing and model performance, achieving over 90% detection accuracy across multiple content formats.
- Enhanced the platform with misinformation detection and chatbot features to improve user interaction and accessibility.

Smart Resume Screening & Candidate Ranking System

Technologies: Python, Flask, React.js, MySQL, spaCy, Sentence Transformers

- Developed an AI-powered resume screening platform that automates candidate evaluation and ranking based on job requirements.
- Built an NLP pipeline to extract candidate information from PDF and DOCX resumes and store data in MySQL.
- Implemented semantic matching and scoring mechanisms to compare candidate profiles with job descriptions and generate ATS-style rankings.
- Developed a dashboard for displaying candidate rankings, match scores, and recruitment insights, reducing manual screening effort.

INTERNSHIPS

Data Science Intern | QSpiders, Hebbal Feb 2026 – May 2026

- Worked with Python, NumPy, Pandas, and data preprocessing techniques for data analysis and machine learning tasks.
- Applied data science and machine learning concepts through project-based assignments, problem-solving exercises, and technical presentations.

Artificial Intelligence Intern | LearnX (Powered by Wipro) 2 Months

- Applied Artificial Intelligence and Machine Learning fundamentals through hands-on projects and practical learning modules.
- Worked on data processing, model development workflows, and real-world AI application use cases.

EDUCATION

Bachelor of Engineering (B.E.) in Artificial Intelligence & Machine Learning

K N S Institute of Technology, Bengaluru

2022 – 2026 | **CGPA: 7.78**

CERTIFICATIONS

- Microsoft Azure Administrator
- Develop Solutions for Microsoft Azure
- Designing and Implementing a Microsoft Azure AI Solution
- Artificial Intelligence Internship Certification – LearnX (Powered by Wipro)
